## **Longitude Clues Worksheet 2012**

Using Sunrise Clues to Estimate Longitude

Note: Sample C is for a location that is <u>east</u> of Greenwich, England.

# Mystery Class #: Sample C

- **1. Locate Greenwich, England on the map.** Greenwich, England is on the prime meridian at 0 degrees longitude. On the morning of March 20, 2012, the sun will rise in Greenwich at 6:02 UT.
  - Mark the location of Greenwich on the map.
  - Write the time of sunrise at Greenwich beside the prime meridian.

#### 2. Record sunrise time for the Mystery Class.

Look up the sunrise time for this Mystery Class on the "Sunrise on the Equinox" table. Remember: Universal Time includes the time and date in Greenwich.

Place of Sunrise	Greenwich, England	Mystery Class # <u>Sample</u> <u>C</u>
Time of Sunrise (UT)	6:02 March 20	22:02 March 19

#### 3. Is the Mystery Class east or west of Greenwich?

The Earth spins to the east. A location with sunrise time *before* Greenwich *is east* of Greenwich; a location with sunrise *after* Greenwich is *west* of Greenwich. Sunrise at this Mystery Class occurred <a href="before">before</a> (before/after) sunrise at Greenwich so I know this Mystery Class is <a href="east">east</a> (east/west) of Greenwich.

- **4. How much time between sunrise at Greenwich and the Mystery site?** The length of time between sunrise at this Mystery Class and sunrise at Greenwich is **2** hours and **00** minutes. (Caution: This may not be a simple subtraction or addition equation. Pay attention to the date of the sunrise time too.)
- **5. For how many minutes does the Earth spin between sunrise times?** The Earth will spin for <u>480</u> minutes between the time sun rises at this Mystery Class location and the time of sunrise at Greenwich. (Clue: convert your answer in #4 above to minutes.)

### 6. How many degrees longitude from Greenwich?

The Earth spins 1 degree longitude every 4 minutes. I estimate the longitude of this Mystery Class to be: 120.00 degrees east (east/west) of Greenwich.
