

TRINATIONAL
MONARCH
CONSERVATION
PARTNERSHIP

The longest journey
starts with a simple action.

MONARCH BLITZ

JULY 28 – AUGUST 6, 2023

REPORT YOUR MONARCH & MILKWEED OBSERVATIONS TO JOURNEY NORTH

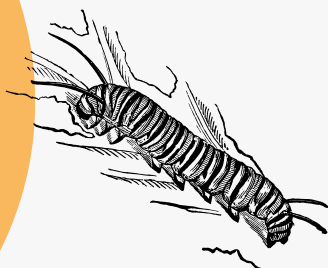

MONARCH ADULT

- **What?** Number of adult monarchs observed during a single sighting
- **How often?** One observation per location during the week of July 28–August 6
- **Photos needed?** Yes, please upload one photo with your report
- **Comments?** Include any interesting behaviors such as flying, nectaring, basking in the sun, etc.

MONARCH EGG AND LARVA

- **What?** Presence of monarch egg(s) and larva(e) observed; no need to count eggs or larvae, but if you do, please place this info in the number field
- **How often?** One observation per location during the week of July 28–August 6
- **Photos needed?** Yes, please upload one photo with your report
- **Comments?** Tell us what milkweed species hosted the eggs and larvae

MILKWEED

- **What?** Presence of milkweed; you do not need to count stems, but if you do, please place this info in the number field
- **How often?** One observation per location during the week of July 28–August 6
- **Photos needed?** Yes, please upload one photo with your report
- **Comments?** Tell us what milkweed species you observed
